

ABHISHEK DIRISIPO

Offensive Cybersecurity Consultant

- Abhishek.dirisipo@gmail.com • +91 9381631362 • India
- [abhishek-dirisipo.github.io/Portfolio](https://github.com/abhishek-dirisipo/Portfolio)
- <https://www.linkedin.com/in/abhishek-dirisipo-0a6553240/>
- Indian Passport Holder

CEH Master | Red Teamer

Hall of Fame: Nvidia,
NiceHash,
Zebpay, Legalzoom, Oracle

ACHIEVEMENTS & RECOGNITION

- **Hall of Fame:** Nvidia (2023), NiceHash / BugCrowd (2022), Zebpay (2023), Legalzoom (2022), Oracle (2026)
- **Reported & remediated 120+ website vulnerabilities** on OpenBugBounty
- **Earned 0.01 BTC bounty** on BugCrowd and with 25+ valid reports on other VDPs in BugCrowd
- **Earned 1000 USDT** from Zebpay (Crypto Platform)
- **Earned 250 USD** again from Zebpay
- **Recognised as Emerging Extraordinaire** and also **Business Extraordinaire** in EY
- 1st Prize - Drawing Competition on National Science Day (ICAR)
- 2nd Rank - Senior Vocabulary Bee Competition, North South Foundation

PROFESSIONAL EXPERIENCE

Associate Consultant - Tech Consulting (Red Teaming)

Ernst & Young LLP (EY)

21 Jul 2025 - Present
India (Hyderabad)

- Performed **on-site internal red teaming** engagements across **multiple states in India**
- Conducted VAPT assessments on web, API, mobile (Android APK & iOS) applications
- Executed confidential emergency audits and government application security reviews
- Performed incident response, root cause analysis (RCA), dark web assessments and threat intelligence
- Delivered cybersecurity training to police officers and enterprise clients
- Handled high-sensitivity engagements under strict confidentiality
- Certified as Emerging Extraordinaire & Business Extraordinaire

Penetration Tester (VAPT)

Vatins Systems Pvt Ltd

01 Jul 2024 - 20 Jul 2025
India (Hyderabad)

- Led Advanced Security Operations and red teaming engagements
- Executed VAPT on web applications, APIs, and internal networks for enterprise clients
- Dark Web Vulnerability assessments, Threat Intelligence, Mobile VAPT
- Simulated real-world attack scenarios and delivered actionable security reports
- Duration: 1 year

Cybersecurity Analyst (VAPT)

Amyntor Tech Solutions Pvt Ltd

13 Dec 2023 - 30 Jun 2024
India (Trivandrum)

- Played a pivotal role in clearing CERT-In certification challenge for the organization
- Conducted VAPT on client applications and delivered detailed remediation reports
- Performed dark web monitoring and threat intelligence gathering
- Duration: 7 months

Q: I wasn't graduated at that time, so how did I already have experience? A: I secured my job through an off-campus opportunity while I was in the second semester of my fourth year of B.Tech. During this period, we did not have regular academic classes, as it was dedicated to our final-year project. Since very few companies hire freshers for cybersecurity roles, I had already been building practical experience from my second year of B.Tech through cybersecurity, bug bounty hunting, and freelance security work, which helped me join Amyntor Tech Solutions as a Cybersecurity Analyst before completing my graduation.

CERTIFICATIONS

- **CEH Master** – EC-Council (CEH Theory + Practical v12)
- **Outstanding Security Researcher** – OpenBugBounty
- **APSCHE-EduSkills Palo Alto Cybersecurity Internship**
- **Cybersecurity** – Blackbucks Engineering Pvt Ltd
- **Python Programming** – Cisco
- **EC-Council CODE RED CTF** (v1, v2, v3)
- **Nation Cadet Corps (NCC)** – A and B Certificate
- **Emerging Extraordinaire** – Ernst & Young
- **Business Extraordinaire** – Ernst & Young

BUG BOUNTY & SECURITY RESEARCH

Security Researcher

BugCrowd

Aug 2022 – Dec 2024
Remote

- 25+ valid vulnerability reports; earned BTC bounty for a critical finding in NiceHash
- Found and reported critical P1 bugs in Nvidia and Zebpay (rewarded USDT)
- Hall of Fame: Nvidia (2023), NiceHash (2022), Zebpay (2023), Legalzoom (2022)

Security Researcher (Outstanding)

OpenBugBounty

Sep 2022 – Dec 2024
Remote

- Reported 120+ vulnerabilities across public websites; 80+ fixed
- Certified as Outstanding Researcher by OpenBugBounty
- Provided free remediation assistance to 60+ public websites

KEY PROJECTS & ENGAGEMENTS

- **AI-Powered Offensive Security Platform (Bug God):** Architected an AI-assisted offensive security platform for automated reconnaissance, browser-based vulnerability verification, intelligent payload generation, and reporting.
- **Enterprise Security Automation Framework:** Developed modular Python and Playwright automation to streamline reconnaissance, asset discovery, vulnerability validation, evidence collection, and reporting.
- **Enterprise Web, API & Infrastructure VAPT:** Performed Web, API, Network, Active Directory, and Infrastructure security assessments, identifying critical vulnerabilities and delivering remediation-focused technical reports.
- **Mobile Application Security Assessment:** Conducted Android application security testing through static, dynamic, API, and reverse engineering analysis to identify critical mobile security weaknesses.
- **Offensive Security Research & Responsible Disclosure:** Conducted independent security research, earning multiple Hall of Fame recognitions through responsible disclosure of high-impact vulnerabilities.
- **Physical Red Team Engagement:** Executed physical security assessments to evaluate facility access controls, employee awareness, and organizational security posture.
- **Assumed Breach Assessment:** Simulated post-compromise adversaries by performing Active Directory enumeration, privilege escalation, lateral movement, persistence, and attack path analysis.
- **Active Directory Security Assessment:** Assessed enterprise Active Directory environments to identify identity, privilege escalation, and misconfiguration risks with hardening recommendations.
- **Internal & External Infrastructure Penetration Testing:** Conducted authenticated internal and external infrastructure assessments across enterprise networks, servers, VPNs, and internet-facing services.
- **Cloud Security Assessment:** Evaluated AWS and Azure environments for IAM, storage, networking, cloud security posture, and configuration security risks.
- **Threat Intelligence & Dark Web Monitoring:** Performed threat intelligence, dark web monitoring, IOC analysis, and credential exposure investigations to support proactive defense.

TECHNICAL SKILLS

Cybersecurity Domains

- Web Application VAPT (OWASP Top 10)
- API Security Testing
- Network Penetration Testing
- Android / iOS Mobile VAPT
- Red Team Operations (Internal & External)
- Targeted Threat Intelligence
- AI - Red Teaming
- Simulated Employee Phishing Test (SEPT)
- AWS Cloud Security
- Incident Response & Root Cause Analysis
- Dark Web Assessment
- Wi-Fi / Wireless Hacking
- Social Engineering
- IoT and Hardware Pentesting

Tools

- Burp Suite
- OWASP ZAP
- Metasploit Framework
- Nmap / Nessus / OpenVAS
- Sqlmap
- Bloodhound, BloodyAD
- Nuclei / Nikto / W3af
- Wireshark
- Aircrack-ng
- John the Ripper
- subfinder / dnsx / httpx
- etc (tools are not limited, I use many tools including custom tools)

Programming & Platforms

- Python, Bash, C
- HTML, CSS, JavaScript
- MySQL
- Kali Linux, Parrot OS, macOS, Windows

EDUCATION

B.Tech - Artificial Intelligence & Data Science

SRKR Engineering College, Bhimavaram

- CGPA: 7.54 / 10.0

20 Dec 2021 – 30 Apr 2024
West Godavari, AP

Diploma - Electronics & Communication Engineering

S.M.V.M Government Polytechnic College, Tanuku

- Academic Average: 74%

01 Jun 2018 – 24 Sep 2021
West Godavari, AP

Secondary Education (6th - 10th Grade)

Jawahar Navodaya Vidyalaya, Pedavegi

04 Jul 2013 – 10 Jul 2018
West Godavari, AP

LANGUAGES

English (Proficient) • Telugu (Proficient) • Hindi (Intermediate) • German (Beginner)
